

# THE IDEAL SOLUTION FOR COMMERCIAL BUILDINGS

[sales@MVIsystems.com](mailto:sales@MVIsystems.com)  
(844) MVI-SYSTEMS

## AND FOR GATED COMMUNITIES

## FUNCTIONAL. SECURE. CONVENIENT.

MVI's proprietary access control abilities use multiple advanced technologies for granting and denying access, so you can be sure that the person gaining access to the property is actually who they claim to be — 100% of the time. Building owners and property managers have access to detailed building access, events, and reporting through our intuitive web portal.

### STATE-OF-THE-ART FEATURES

-  Enhanced Security
-  Audit & track door events
-  Track and resolve service requests
-  Effortless Communication

Property managers and developers looking for better ways to secure their gated communities find that MVI systems not only **increase security, but also save money.**

Equipping your gated community with KeyCom® shows your residents that you value their security. MVI's sleek, stylish solutions streamline the access process, saving your residents the need to stop and check in with a physical guard before entering the property. In fact, many gated communities find they can eliminate the need for a gate guard altogether after KeyCom® installation, saving money for property managers.

### KEYCOM® FOR GATED COMMUNITIES

- Allows authorized visitor access through myKey™
- Increases security by automatically recording a video log of the driver along with the make & model of each vehicle gaining entry to the community. Its even possible to have the license plate recorded as well.
- Saves residents and visitors time by not requiring manual recording of licences or IDs
- Allows selective admittance to delivery drivers or other authorized myKey™ users
- Saves money and resources by eliminating the need for a physical gatekeeper
