## INTUITIVE VIDEO CONFERENCE

Monitor and facilitate convenient access to buildings for both residents and individuals they would like to grant access to.

## MANAGEMENT

Management is able to administer the building residents via MVI's Web Portal to update tenant records or send building-wide messages/notifications/schedules. Building owners and property managers have access to detailed building access events and reporting.

## RESIDENTS

Residents use a Smartphone or MVI's Web Portal to receive video/voice calls, send/receive text messages, grant access to the building, retrieve video/voicemails and manage their account.

## VISITORS

Visitors use the KeyCom® touchscreen to scroll through the building directory and make an apartment selection, either via apartment number, tenant name or any image used by the resident. Video-chat with residents or leave a video voicemail when they are unavailable.

## ENHANCED FEATURES

-  Automatic building access via smartphone
-  State-of-the-art digital video entry
-  Interactive touchscreen technology
-  Easy hands-free Bluetooth access
-  Monitor all building activity
-  Security and convenience

## DELIVERY

Access the building via the KeyCom® touchscreen and deliver packages to our secured package location. No more lost or undeliverable packages!
